ABOUT US

Protech Machinery are a British owned company based in Gloucestershire and manufacture a leading range of machinery to suit all requirements. It is a privately owned company, directed by Steve Craddock and Andy Hooper, both of whom have a wealth of agricultural design, engineering and farming knowledge.

The company has rapidly grown since it was formed in 2003. Success has been fuelled by our dynamic approach, product excellence led by customer feedback and wealth of manufacturing experience and knowledge.

Recognising that many of today's farmers, smallholders and contractors have a requirement for a reliable and durable, quality machinery at an affordable price, Protech have developed an extensive range of Post Drivers alongside the new Protech P6000 Reach Mower range, and Tracked Post Driver Machine.

Andy, Steve and the Protech team pride themselves on using only the best British materials to ensure only the finest machines are produced and are renowned for being the leaders in innovation. Machines are designed and built in house which offers the excellent ability to make bespoke machines and tailor machines exactly to the customer's requirements.
